

Pierce Odonnell

Web developer & product owner

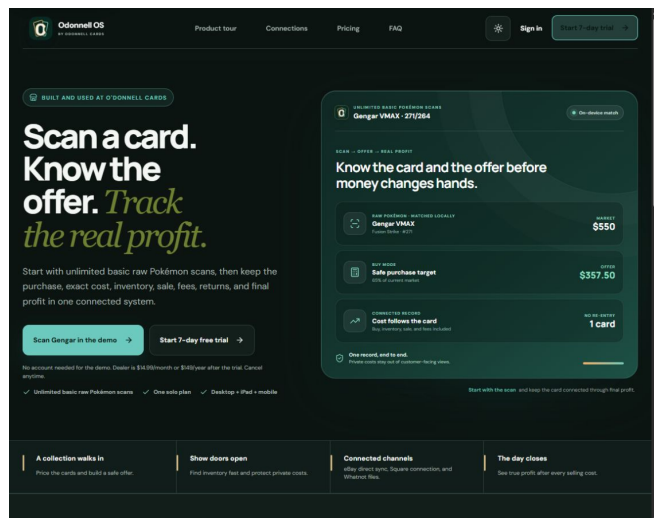

Focused pages, clear interfaces and connected business workflows.

I build and improve web applications with React, Next.js and TypeScript. My original product, O'Donnell OS, connects inventory, sales, customer records, fulfillment and reporting in one workspace.

SELECTED PROJECT

O'Donnell OS

Original product | Owner & developer

A live business application with a public product page and a guided demo using sample data. Anyone can try it without signing in.

Connected workflows

Purchase and exact cost, inventory, sales, returns, customer records and reporting.

Implementation

React, Next.js, TypeScript, Supabase, CSV workflows, API integrations, automated tests and database migrations.

LIVE PRODUCT SCREENSHOT

SERVICES

Responsive landing pages
Dashboard layouts and forms
Small UI fixes and bug reproduction
CSV imports, exports and automation

DELIVERY

Agreed scope and acceptance criteria
Updated source and relevant checks
Clear change notes and setup guidance
Browser checks before delivery

[Contact on Upwork](#)

Portfolio links are work samples. Please contact me through Upwork about freelance projects.

Find the work that fits.

Each example pairs a designed interface with a working task. Open the live demo to inspect the details. The images below are actual interface captures.

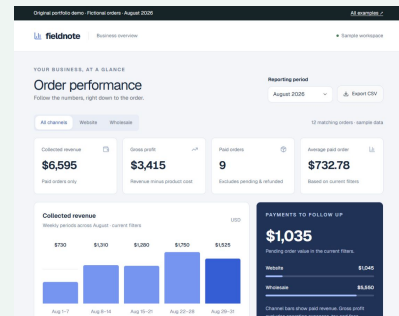

SERVICE WEBSITES

Sunday Home

Compare visit plans, change home size and review an itemized clean. All 120 supported price combinations checked.

[Open live demo >](#)

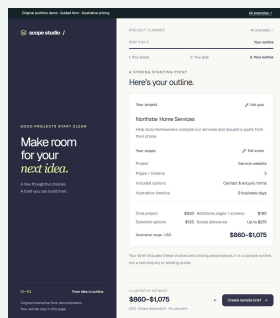

DASHBOARDS & REPORTING

Fieldnote

Combine filters, open an order and review the matching CSV. Revenue and profit reconcile to the sample records.

[Open live demo >](#)

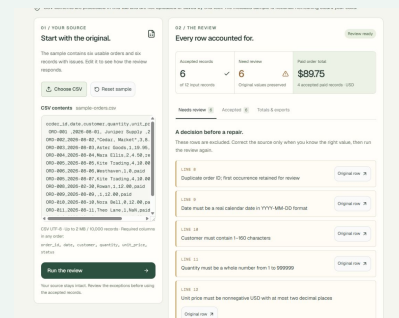

FORMS & QUOTING

Scope Studio

Build a scope, correct field errors and edit the review. The itemized estimate and complete project brief update together.
