

SERVICE WEBSITE / ORIGINAL DEMONSTRATION

Sunday Home

A calmer way to choose a home cleaning visit.

I designed and built a residential service website that lets a visitor compare cleaning plans, estimate a visit and review exactly what is included.

My work

Visual design, responsive page layout, estimator logic, service content and the interactive visit preview.

Try it

Choose a plan, change the home size and visit frequency, then open the itemized preview.

Try Sunday Home

Clear choices

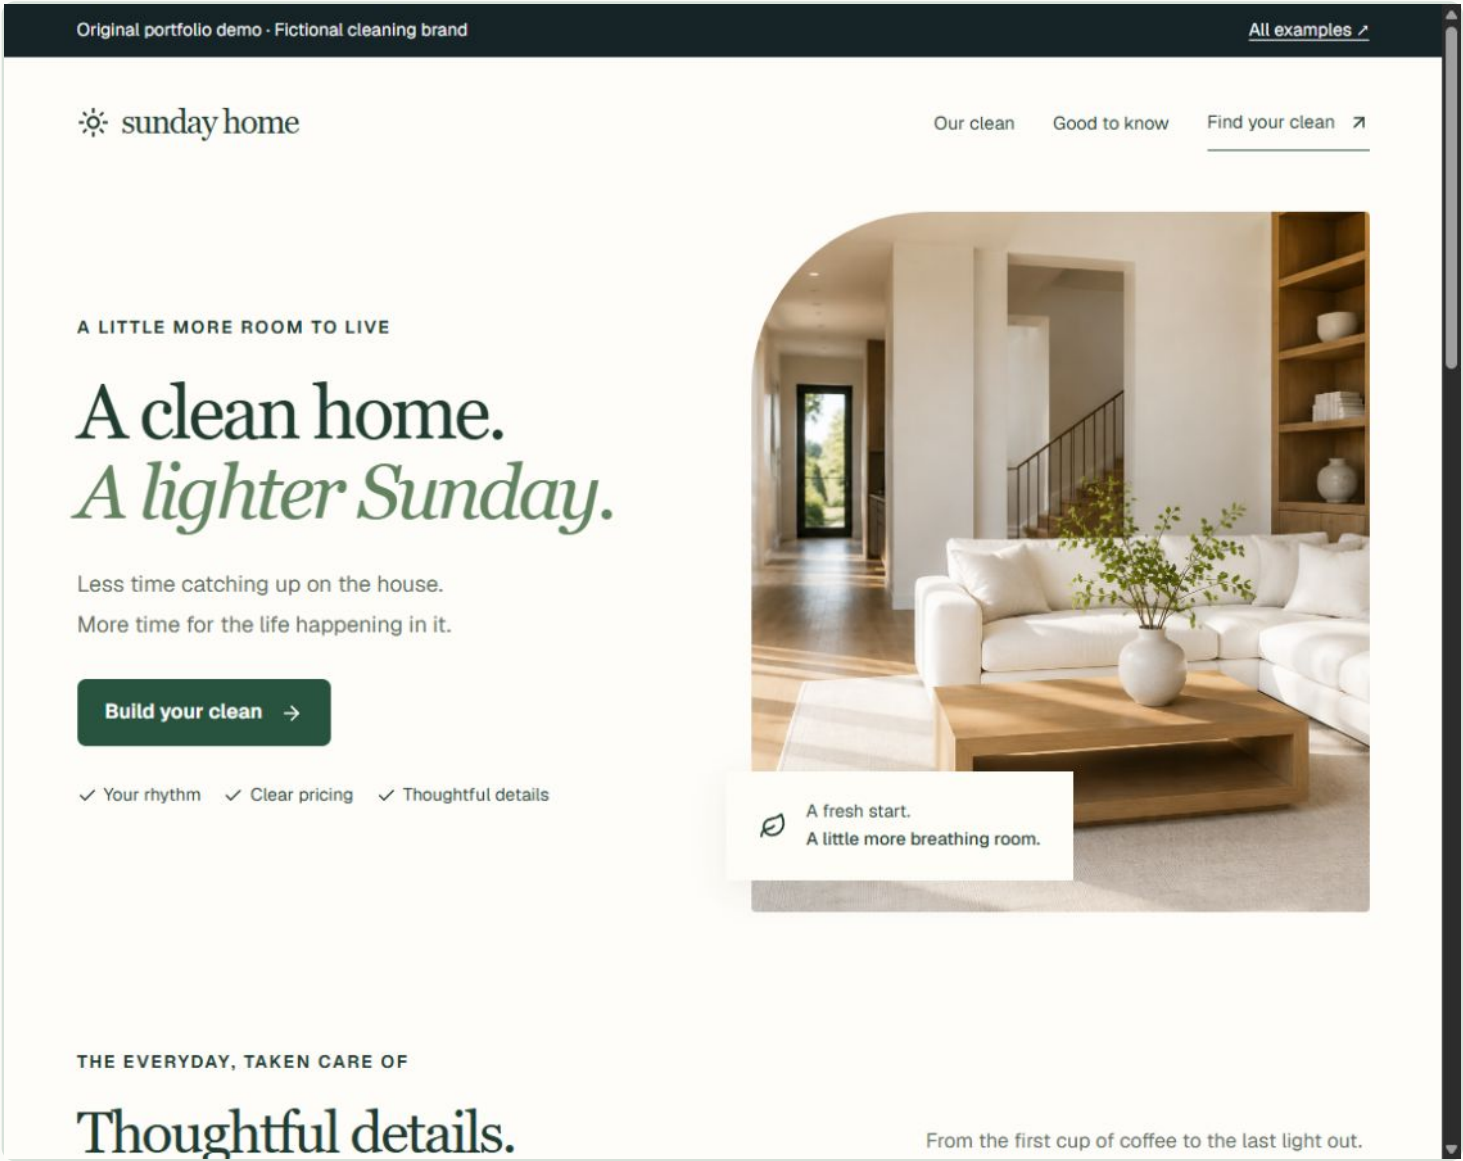

Three visit plans with concrete service details and an immediate sample estimate.

Reconciled pricing

All 120 supported pricing combinations checked. Itemized discounts reconcile to the cent.

Honest scope

An interactive frontend demo. It does not take payments or create real bookings.

ACTUAL INTERFACE / FICTIONAL CLEANING BRAND

REPORTING DASHBOARD / ORIGINAL DEMONSTRATION

Fieldnote

Follow the numbers to the individual order.

A focused sales dashboard that connects summary cards, weekly revenue and a searchable order table. Each order opens into a readable detail view.

My work

Interface design, combined filters, ordering, computed summaries, record details and CSV preview/export.

Try it

Filter to Website orders, open an order number, then preview the matching CSV rows.

Try Fieldnote

Defined totals

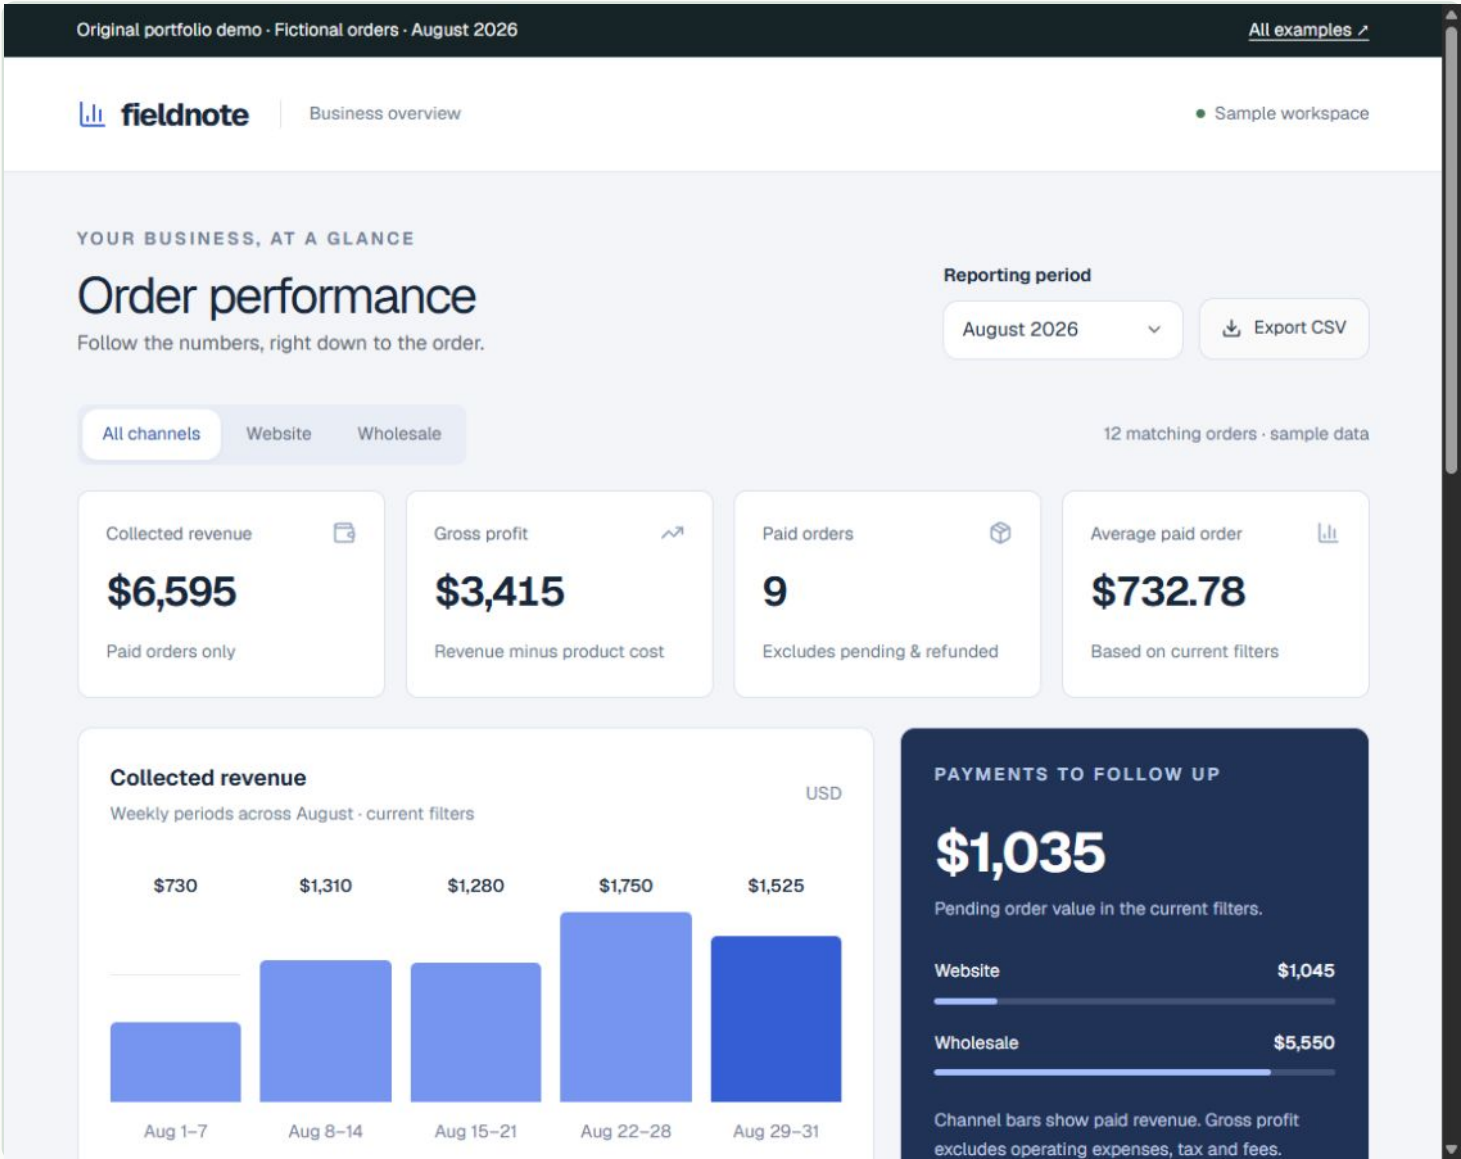

Collected revenue counts paid orders. Gross profit subtracts recorded product cost.

A traceable result

Nine paid sample orders total \$6,595 revenue and \$3,415 gross profit. Weekly bars reconcile.

One consistent view

CSV preview follows the table filters and sort order, preserving every order status.

ACTUAL INTERFACE / 12 FICTIONAL SAMPLE ORDERS

GUIDED FORM / ORIGINAL DEMONSTRATION

Scope Studio

From a few choices
to a useful project brief.

A three-step planner for a website or dashboard.
The visitor chooses scope, explains the goal and
reviews an itemized outline before exporting it.

My work

Form flow, field validation, pricing breakdown,
editable review, focus handling and text export
preview.

Try it

Choose three pages and a contact form. Add the
sample details, then review and export the outline.

Try Scope Studio

Helpful validation

Names and project goals have clear limits. Errors point
to the field that needs attention.

GOOD PROJECTS START CLEAR

Make room
for your
next idea.

A few thoughtful choices.
A brief you can build from.

A STRONG STARTING POINT

Here's your outline.

Your project

Northstar Home Services

Help local homeowners compare our services and request a quote from their phone.

Your scope

Project

Pages / screens

Included options

Illustrative timeline

Service website

3

Contact & enquiry forms

9 business days

Core project

\$550

Additional pages / screens

\$190

Selected options

\$120

Scope allowance

Up to \$215

Illustrative range · USD

\$860–\$1,075

Your brief includes these choices and pricing assumptions. It is a sample outline, not a real enquiry or binding quote.

ACTUAL REVIEW STATE / ILLUSTRATIVE PRICING

Transparent estimate

The sample outline separates base work, extra pages,
selected features and an allowance.

Review before export

Visitors can edit previous choices and read the full
brief. Nothing is sent to a business.

Original work. Demo brands, prices and data are fictional.

ORIGINAL PRODUCT / OWNER & DEVELOPER

O'Donnell OS

Connected tools for everyday business work.

My original business application brings inventory, purchase costs, sales, returns, customer records and reporting into one workspace.

My work

Product development with React, Next.js, TypeScript and Supabase, including CSV workflows and API integrations.

Try it

Open the guided public demo. It uses sample data and can be explored without signing in.

Try the product demo

Connected workflows

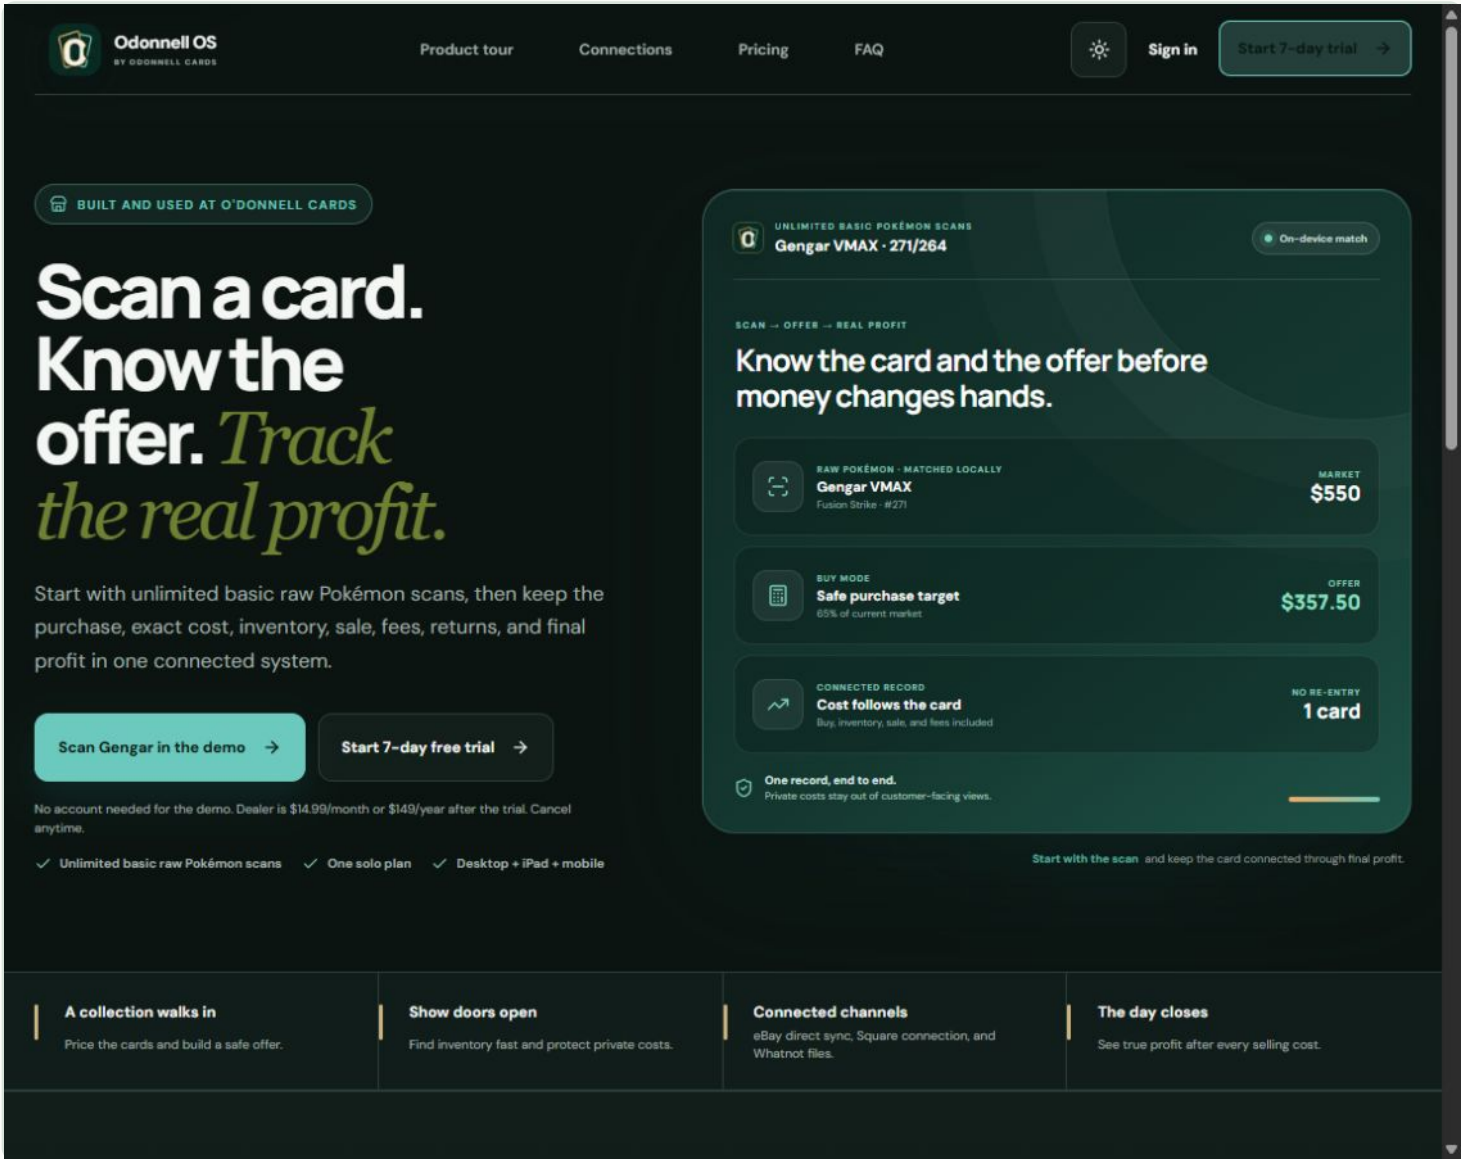

The product links day-to-day operational tasks instead of showing isolated UI screens.

Practical development

Relevant automated checks, database migrations and clear setup/change documentation.

O'Donnell OS Studio

My independent studio for websites, business systems and automation. Visit the live studio.
